

SUPERSEMPS™ SEMPERVIVUM ONYX

KEY FEATURES

- Sempervivum 'Onyx' belongs to the amazing new range of SUPERSEMPS™, bred in Germany
- 'Onyx' is named after the exquisite onyx stone, for its mahogany black colouration
- Forms perfect, extra-large, symmetrical rosettes up to 20cm diameter
- Clusters of pink star-shaped flowers appear in mid to late summer
- Outstanding when mixed with contrasting-coloured succulents, but equally outstanding featured alone!
- Drought, wind and cold tolerant (if kept dry)
- Place in full sun for the most intense colour
- 20cm wide x 12cm high
